MID ATLANTIC AREA — April 2011— In April 2011, WM Healthcare Solutions, Inc. acquired a medical waste processing facility and collection assets based in Norfolk, Va., from American Environmental Group. Waste Management purchased regulated medical waste and pharmaceutical collection, transport, processing and disposal, including U.S. Department of Agriculture and APHIS (Animal and Plant Health Inspection Service) treatment and disposal. The acquisition includes a 20,000 square-foot facility in Creswell, N.C., and various transfer stations in the mid-Atlantic area.

"The acquisition fits into Waste Management's strategy to manage solid waste, medical, recycling and pharmaceutical waste for the healthcare industry," said Mike McNerney, vice president of Waste Management Healthcare Solutions. The treatment facility today serves approximately 400 large and small healthcare facility customers, and employs 50 people.

"We purchased the operations of American Environmental Group so we could expand our medical waste business in the North Carolina, Virginia, Delaware and Maryland area and beyond," McNerney said. "Our unique integrated solutions increase value by managing materials more efficiently to help lower the costs for our customers, while maintaining safety and compliance standards."

ABOUT WASTE MANAGEMENT

Waste Management, Inc., based in Houston, Texas, is the leading provider of comprehensive waste management services in North America. Through its subsidiaries, the company provides collection, transfer, recycling and resource recovery, and disposal services. It is the largest recycler in North America and a leading developer, operator and owner of waste-to-energy and landfill gas-to-energy facilities in the United States. The company's customers include residential, commercial, industrial, and municipal customers throughout North America.
