

SECURITY SERVICES

We oversee  
everything.

We overlook  
nothing.

THINK GREEN.®

## SECURITY SERVICES

### Visionary tools for real-world business.

When Waste Management set out to find a security firm for our more than 2,000 facilities and \$25 billion in assets, we wanted more than just advanced protection. We wanted our investment in security technology to make our business run better. But the system we needed didn't exist. So we invented it ourselves.

Now we're putting our sweat equity to work for businesses like yours, to help you maximize opportunities and minimize problems. The cameras that monitor human activity can also reveal more efficient ways to use assets. The reporting tools that document breaches can also provide a database for facilities planning. The video that captures procedure lapses can also serve as a tool for employee training.

Our total, customized suite of services can guide and guard all your operations.

Unlike other companies, we use advanced technology to turn surveillance cameras into real-time productivity and protection tools. Our security services team uses Intelligent video monitoring, anchored by our state-of-the-art Master Control Center, to instantly alert your organization when a situation arises – whether it's a safety infraction, rising water, unauthorized personnel on site, a medical emergency, or anything else that requires a response.

**FOR MORE INFORMATION, PLEASE CALL 1-800-882-3149 AND SPEAK WITH ONE OF OUR SECURITY SERVICES EXPERTS.**

### CUSTOMIZED PRODUCTS AND SERVICES

We tailor our surveillance services to produce maximum operational efficiencies for your specific needs and business size. These services include:

- Video monitoring
- Fire alarm monitoring
- Burglar alarm monitoring
- Environmental condition and temperature monitoring
- Access control
- Mobile surveillance systems
- Lone-worker safety monitoring

### ADVANCED SECURITY TECHNOLOGY

The technology we use is at the forefront of surveillance capabilities and is able to distinguish, for example, between a cat, a leaf, or an actual threat. This gives us the ability to respond quickly and effectively when the need arises. We will work with you to determine the most appropriate mix to deploy for your business and security needs.

- Intelligent video monitoring
- Robust alarm platform
- VideoFied™
- Global Positioning Systems (GPS)

### RESEARCH AND DEVELOPMENT LAB

Our clients benefit from our top-tier research and development lab, which performs independent technical assessments, testing and analysis of the security systems we assemble. In addition, leading manufacturers routinely rely on our lab to beta test their new security technologies.
