

CALIFORNIA MANDATORY Commercial Recycling Laws

AB1826

ORGANICS RECYCLING

AB341

RECYCLING

The Law

California law requires **businesses that generate 4 cubic yards or more of solid waste per week** to recycle the organic portion of their waste. Organics include food scraps, food-soiled paper, landscape trimmings and nonhazardous wood waste.

Multifamily complexes with 5 or more units are required to recycle only landscape waste.

See reverse side for a composting guide.

4 CUBIC YARDS IS THE EQUIVALENT OF 8.5 96-GALLON CARTS.

The commercial sector generates nearly three fourths of the solid waste in California. Much of the commercial sector waste disposed in landfills is readily recyclable.

AB 341 requires all businesses that generate 4 cubic yards or more of solid waste per week to arrange for recycling services. Multifamily complexes with 5 or more units are also required to have a recycling program.

See reverse side for a recycling guide.
