

WASTE MANAGEMENT SUSTAINABILITY SERVICES

We aren't just advocates for improved environmental performance, we make it happen for our clients.

Working in collaboration with clients around the globe, we design, develop and implement a wide range of advanced, customized and cost-saving solutions that adapt to a company's evolving needs. We become part of your team from start to finish, helping your business mitigate risk, innovate, and optimize the use of materials to become better stewards of the environment. Clients gain access to Waste Management's operational knowledge and the sustainability consulting expertise of our diverse team of experts—the top executives, engineers, scientists, analysts, and innovators in the industry. Each client is assigned its own personalized team of materials management experts who embed themselves in the organization, on site or remotely, to ensure that the programs they construct are executed to drive economic, environmental and social value.
