Alternative Language Notice Instructions

For certain permit applications, public notice in an alternate language is required. If an elementary school or middle school nearest to the facility offers a bilingual program, notice may be required to be published in an alternative language. The Texas Education Code, upon which the TCEQ alternative language notice requirements are based, trigger a bilingual education program to apply to an entire school district should the requisite alternative language speaking student population exist. However, there may not exist any bilingual students at a particular school within a district which is required to offer the bilingual education program. For this reason, the requirement to publish notice in an alternative language is triggered if the nearest elementary or middle school, as a part of a larger school district, is required to make a bilingual education program available to qualifying students and either the school has students enrolled at such a program on-site, or has students who attend such a program at another location in satisfaction of the school's obligation to provide such a program as a member of a triggered district.

If it is determined that an alternative language notice is required, the applicant is responsible for ensuring that the publication in the alternate language is complete and accurate in that language. Electronic versions of the Spanish template examples are available from the TCEQ to help the applicant complete the publication in the alternative language.

Alternative Language Notice Application Form:

Alternative language notice confirmation for this application:

1. Is a bilingual program required by the Texas Education Code in the school district where the facility is located? ☒ YES ☐ NO

(If NO, alternative language notice publication not required)

2. If YES to question 1, are students enrolled in a bilingual education program at either the elementary school or the middle school nearest to the facility? ☒ YES ☐ NO

(If YES to questions 1 and 2, alternative language publication is required; If NO to question 2, then consider the next question)

3. If YES to question 1, are there students enrolled at either the elementary school or the middle school nearest to the facility who attend a bilingual education program at another location? ☐ YES ☐ NO

(If Yes to questions 1 and 3, alternative language publication is required; If NO to question 3, then consider the next question)

4. If YES to question 1, would either the elementary school or the middle school nearest to the facility be required to provide a bilingual education program but for the fact that it secured a waiver from this requirement, as available under 19 TAC '89.1205(g)?
☐ YES ☐ NO

(If Yes to questions 1 and 4, alternative language publication is required; If NO to question 4, alternative language notice publication not required)

1 GENERAL

30 TAC §330.59(a)(1)

The Skyline Landfill is an existing Type I Municipal Solid Waste Disposal Facility (Permit No. MSW 42C) owned and operated by Waste Management of Texas, Inc. (WMTX). The Skyline Landfill is located in Dallas and Ellis Counties, Texas and provides waste disposal capacity for residences and businesses in Dallas and Ellis Counties and surrounding Texas counties. WMTX proposes to increase the remaining permitted disposal capacity of this facility via a horizontal expansion. The expansion of Permit No. MSW 42C is submitted by this permit amendment application as Permit No. MSW 42D.

This application has been prepared consistent with 30 Texas Administrative Code (TAC) Chapter 330 Municipal Solid Waste Management Regulations (MSWMR) adopted by the Texas Commission on Environmental Quality (TCEQ), effective March 27, 2006 and May 29, 2008.

Part I of this permit amendment application contains information about the site and the applicant as required in 30 TAC §§281.5, 305.45, and 330.59. Part II of the permit amendment application describes the existing conditions and character of the facility and surrounding area as required in §330.61. Part III of the permit amendment application presents engineering information, detailed investigative reports, the schematic designs of the facility, and the required plans as required in §330.63. Part IV of the permit amendment application contains the Site Operating Plan, which includes specific information regarding the daily operations of the site as required in §330.65.

1.1 Permit History

The Skyline Landfill was originally permitted by the State of Texas in 1976 as Permit No. MSW 42. Trinity Valley Reclamation was issued a permit amendment by the Texas Department of Health (Permit No. MSW 42A) in 1979 with a permit boundary of approximately 73 acres. The facility was acquired by WMTX from Trinity Valley Reclamation in 1987. Permit No. MSW 42C was issued on April 18, 1995, which expanded the landfill to a permit boundary of 666.95 (667) acres. The Skyline Landfill is currently operating under the 1995 permit requirements and any subsequent modifications or authorizations.

Consistent with §305.45(a)(7), the permits and approvals received for the facility are listed as follows:

Received	Texas Commission on Environmental Quality Texas Pollutant Discharge Elimination System Storm Water Multi-Sector General Permit, Permit No. TXR05U147
Received	Texas Commission on Environmental Quality Petroleum Storage Tank Registration, Registration No. 50511

Received	Texas Commission on Environmental Quality Air Permits Division, Air New Source Permits 25101, 42830, 78422, 78639, 1485
Received	Texas Commission on Environmental Quality Sludge Registration, Registration No. 710865
Received	Texas Commission on Environmental Quality Municipal Solid Waste Processing Registration, Registration No. 48018
Received	U.S. Army Corps of Engineers, Section 404 Individual Permit No. SWF-2009-00371
Applied	City of Ferris Floodplain Administrator – Placement of Fill in the 100-Year Floodplain

1.2 Supplementary Technical Report

The Skyline Landfill is an existing 666.95-acre (667 acres), Type I municipal solid waste disposal facility owned and operated by Waste Management of Texas, Inc. (WMTX). The Skyline Landfill is located in Dallas and Ellis Counties, on the north side of the city of Ferris within the city limits of Ferris, Texas and west of Old U.S. Highway 75 (Business IH 45). The Skyline Landfill provides waste disposal capacity for residences and businesses in Dallas and Ellis Counties and surrounding Texas counties.

The current permitted Skyline Landfill consists of a permit boundary of about 667 acres. The area within the permit boundary consists of 286.4 acres of permitted waste disposal footprint (Phase 1, 2, 3, 4, and 5), 68.3 acres of Pre-Subtitle D area with final cover constructed, and 312.3 acres of buffer and other areas. The waste disposal footprint includes approximately 146.5 acres of active waste disposal area and approximately 139.9 acres of future disposal area. There are approximately 68.3 acres of Pre-Subtitle D area that have received final cover and will not accept any additional waste. The remaining site is currently active and all future development is under Subtitle D standards and requirements.

The permit amendment application will reduce the current permit boundary by 5.21 acres. The Skyline Landfill proposed permit boundary is 661.74 (662) acres. The proposed landfill expansion will remove approximately 20.1 acres and add approximately 22.3 acres of waste footprint for a net increase of 2.2 acres of waste disposal footprint. The maximum final contour elevation will remain at 688 feet-msl, and the permit boundary will remain at approximately 667 acres. The waste disposal footprint will be increased to approximately 284.4 acres for Phases 1, 2, and 3. The Phase 4 designation will not be used for phases with this expansion. Phase 5 consists of 4.2 acres.

Locations outside the permitted waste disposal areas that are used for buffer distance between waste disposal areas and the permit boundary include entrance facilities, a Type IX Beneficial Landfill Gas Recovery Facility (Type IX Registration No. 48018), a citizen's convenience center, a leachate storage facility, a mud grate facility, a maintenance facility, access roads, and surface water drainage facilities. Waste processing and storage facilities located within the waste disposal footprint include a

large item storage area, a construction and demolition recycling and re-use area, a liquid stabilization area, and a bioremediation treatment pad. There are two easements through the facility being Lone Star Gas and TU Electric, neither of which impact the development or operations of the facility.

The proposed landfill expansion will result in a remaining waste disposal capacity of approximately 53,505,000 cubic yards of waste and daily/intermediate cover, or approximately 41,198,850 tons of waste capacity, based on the March 4, 2012 aerial topography.

The Skyline Landfill receives approximately 1,040,000 tons annually (approximately 3,333 tons per day). The waste acceptance rate will vary over the life of the facility depending on market conditions. WMTX anticipates the maximum rate of waste disposal to be approximately 1,622,740 tons per year (approximately 5,200 tons per day). Based on the current waste acceptance, the facility will have an approximate site life of 33 years.

The following table provides a summary of the current permit conditions and proposed permit conditions:

NOTES:

LandTec Engineers, LLC was retained by Waste Management of Texas, Inc. in January 2012 to retrace and perform an "on the ground survey" of the Skyline Landfill Permit Boundary, and provide a new drawing for the landfill permit application submittal, planned for February 2012.

John Nall, Jr., RPLS, a Texas Surveyor with Boundary Mark, Inc., originally performed a permit boundary survey in 1994, during the timeframe Waste Management was permitting Skyline Landfill and Recycling Center in Ferris, Texas. He located existing iron pins and set iron pins where none were found; determined the latitudes, longitudes and distances for the boundary; prepared a survey sketch drawing; and, prepared the typical meets and bounds legal description on a separate typed document. We were provided a copy of the survey sketch prepared by Mr. Nall; however, the drawing is not legible. The drawing is stamped "For Permit Purposes Only".

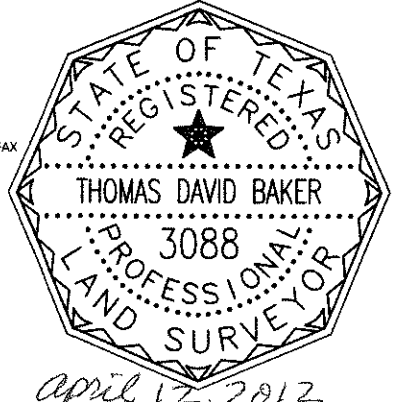

Using the meets and bounds of Mr. Nall's original survey, provided to us by Waste Management, we were able to retrace the boundary and found several original iron pins and reset the remaining pins, with the exception of the boundary which falls in Ten Mile Creek, on the north side of the landfill.

The original drawing, produced by Mr. Nall, contained and described several easements for electrical power, sewer, gas and adjoining properties. The meets and bounds for these easements were not legible on Mr. Nall's survey sketch provided to LandTec. A legible copy and/or the originals have not been found and made available to LandTec.

LandTec performed a records search for easements associated with this property. Survey records that were found in Dallas and Ellis Counties have been shown on this drawing.

ISSUED FOR PERMITTING PURPOSES ONLY - This document shall not be recorded for any purpose.
