Cautionary Statement

Certain statements provided in this presentation are “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements are often identified by the words, “will,” “may,” “should,” “continue,” “anticipate,” “believe,” “expect,” “plan,” “forecast,” “project,” “estimate,” “intend” and words of similar nature, and such statements generally contain projections about accounting and finances; plans and objectives for the future; projections or estimates about assumptions relating to our performance; or our opinions, views or beliefs about the effects of current or future events, circumstances or performance. You should view these statements with caution. These statements are not guarantees of future performance, circumstances or events. They are based on the facts and circumstances known to us as of the date the statements are made. All phases of our business are subject to uncertainties, risks and other influences, many of which we do not control. Any of these factors, either alone or taken together, could have a material adverse effect on us and could cause actual results to be materially different from those set forth in such forward-looking statement. We assume no obligation to update any forward-looking statement, including financial estimates, whether as a result of future events, circumstances or developments or otherwise. Some of these risks and uncertainties are described in greater detail in Waste Management's Form 10-K for the year ended December 31, 2009, as filed with the Securities and Exchange Commission.
Non-GAAP Financial Measures

This presentation contains non-GAAP financial measures under Regulation G of the Securities Exchange Act of 1934, as amended. The Company believes that these non-GAAP financial measures are useful to investors to assess the Company’s performance, results of operations and cash available for the Company’s capital allocation program. These non-GAAP measures are meant to supplement, not replace, comparable GAAP measures, and such non-GAAP measures may be different from similarly titled measures used by other companies. A reconciliation of these non-GAAP financial measures to their most directly comparable financial measures calculated and presented in accordance with generally accepted accounting principles can be found in the Annex at the end of this presentation and under the Investor Relations tab on our website: www.wm.com.
Today’s $55 Billion Solid Waste Market

Key Industry Strengths

• Disciplined pricing

• Improving return on invested capital is a primary focus

• A significant portion of revenue has annuity-like characteristics

• Capital expenditures are controllable and predictable

• Cash flow is strong and predictable
WM 2009 Revenue Mix by Line of Business

Based on 2009 Gross Revenues

Revenue base is well diversified

Approximate Collection Mix

- Residential: 32%
- Commercial: 43%
- Roll-off: 25%

Collection: 58%

Waste-to-Energy: 6%

Transfer: 10%

Landfill: 19%

Recycling: 5%

Other: 2%

Based on 2009 Gross Revenues
Our Strategy

- Continue to focus on price, targeting 50 to 100 basis points above CPI
- Know more about our customers and how to service them better than anyone else in the industry, through the use of customer focused segmentation and technology
- Manage the waste stream to extract more value from the material than anyone else in the industry
Yield and Volume Trends
Collection and Disposal Operations

* Source: United States Department of Labor - Bureau of Labor Statistics
Continued Growth of Landfill Volumes

• Economic and population growth expected to increase disposal volumes in the future

• Volumes tend to lag the economy by one to two quarters

• Increasingly complex society and regulations
  - Individual servings and packaging
  - Waste streams, like coal ash, that could be directed into landfills by regulations
Strategic Growth Plan

**GROW OUR MARKETS**
- Customer focused growth through segmentation
  - Commercial property
  - Manufacturing & industrial
  - Retail & food
  - Construction
  - Municipal
  - Healthcare
  - Core accounts
- Acquisitions
- Recycling – single stream

**GROW OUR CUSTOMER LOYALTY**
- Improved customer engagement
- Self-service capabilities
- Lower cost of service

**GROW INTO NEW MARKETS**
- Waste-to-energy opportunities
- Organic growth initiatives
  - Processing & conversion technologies
    - Organics
    - Non-organics
  - Bagster dumpster in a bag
- Other forms of recycling
Why Customer Focused Growth through Segmentation is Right for WM

- Customer focused growth through segmentation presents an opportunity to drive significant incremental value by:
  - **Improving sales effectiveness** with focused and specialized reps that understand customer needs, i.e. one point of contact
  - **Increasing penetration** within the most profitable segments by establishing better relationships with customers within segments
  - **Better aligning pricing strategies** with segment-specific economics and Customer Lifetime Value
  - **Expanding the market size** by identifying and adding new service offerings
  - **Differentiating WM offerings** to better meet the specific segment needs
Medical Waste Value Driver – Waste Categorization

Waste Generation

- Incinerate Only
  - ($1.00/lb)

Waste Diversion

- Redbag
  - ($0.24/lb)
- Trash
  - ($0.06/lb)
- Recycling
  - ($0.01/lb)

Waste diversion = $$$ savings for the customer
Long-Term Vision and Financial Impact of Customer Segmentation

By providing the customer a better value proposition through segmentation, WM plans to add over $1.6 billion in revenue over the next 5 years.
MSW Volume Trends

Total Historical Waste Generation and Recovery

- Total MSW Generation
- Post Recovery MSW available for landfill or WTE

Source: 2009 WBJ Waste Market Overview and Outlook
How We Extract Value from Material

- Waste-to-energy (energy from waste)
- Curbside and commercial recycling
- Landfill-gas-to-energy or to fuel
- C&D recycling
- Roof shingle recycling
- Greenopolis
  - Recycling kiosks and on-line rewards
- WM LampTracker®
  - Florescent light bulb recycling
- ThinkGreenFromHome.com
  - Batteries and universal waste recycling
- MicroGREEN
  - Expansion technology for plastics
- eCycling
  - Electronics recycling
- New technologies in organics processing
  - Garrick Corporation
    - Organic compost for retail market
  - Harvest Power
    - Aerobic and anaerobic digestion
  - Terrabon L.L.C.
    - Waste-to-fuel conversion technology
  - Enerkem, Inc.
    - Gasification and catalysis technology
  - S4 Energy Solutions
    - Plasma gasification technology
Why Invest in Waste-to-Energy?

- Waste-to-energy (WTE) is a core competency with attractive growth opportunities
- WTE has high margins and returns
  - Income from operations margin* of almost 28% in 2009
  - Minimum internal rate of return criteria for new projects is 11%
- Long-term contracts on new projects provide an annuity-like revenue stream
- WTE has strong and stable cash flow
- Merchant energy sales price volatility due to correlation with natural gas prices is being mitigated with hedges
- Capital expenditures are modest over the near-term and very manageable over the long-term. For our new U.S. opportunities our customer is funding the construction

* This GAAP measure may also be referred to as EBIT margin
Waste-to-Energy
Current Opportunities

• United States
  - Purchased SPSA, a 2,000 ton per day facility located in Portsmouth, VA
  - Awarded design-build-operate contract in Frederick/Carroll Counties, MD
  - Preferred vendor for design-build-operate contract in Harford County, MD

• China
  - Purchased 40% interest in Shanghai Environment Group
    • 2 facilities operating, 3 facilities under construction and 3 contracts recently awarded
  - Waste volume growth, energy demand, and metropolitan land scarcity has driven public policy to promote significant investment in waste-to-energy

• UK/Europe
  - Participating in UK bids with local partners Shanks Group, Cory Environmental, and EEW
  - EU Directive is driving a 65% reduction of landfill waste by 2016. Waste-to-energy is the most economic alternative
Financial Performance and Outlook
How We Measure Ourselves

• Returns are our primary focus
  - In 2005 we made return on invested capital our key long-term focus, changing our Long-Term Incentive plan accordingly
  - At 10.3% in 2009, our return on invested capital is the best in the industry*

• Improving margins in each of our businesses
  - Improving margins is a requirement in our Annual Incentive Plan targets

* See the annex at the end of this presentation for a reconciliation of this non-GAAP financial measure to the most directly comparable GAAP measure
Financial Priorities

- Maintain our investment grade ratings. Our Revolving Credit Agreement requires compliance with the following financial covenants defined therein:
  - Interest coverage ratio (EBIT to Consolidated Total Interest Expense): > 2.75 to 1 and Total Debt to EBITDA: < 3.5 to 1*
  - As of June 30, 2010, ratios were 4.3 to 1 and 3.0 to 1 for each respective covenant*
- Maintain debt/total capitalization ratio of approximately 60%
  - Ratio at June 30, 2010 was 59.9%
- $600 million of senior notes were issued in June 2010 and the proceeds were used to retire $600 million of senior notes that matured in August 2010
  - Future senior note debt maturities are well distributed; no year exceeds $600 million
- Balanced use of substantial free cash flow
  - Return value to shareholders through dividends and share repurchases
  - Invest in the business through capital expenditures and acquisitions
  - Debt repayment as appropriate

*These two covenants are calculated using “EBIT” and “EBITDA”, respectively, as defined in our Revolving Credit Agreement. EBIT and EBITDA are non-GAAP financial measures, and pursuant to our Revolving Credit Agreement, are subject to specific adjustments. See the Annex at the end of this presentation for a reconciliation of Defined EBIT and Defined EBITDA used to calculate these ratios to the most directly comparable GAAP Measure.
Margin Leverage with Volume Changes
Collection and Landfill

Weighted Average Incremental Income from Operations Margin* by Line of Business

Total collection and landfill assumes an equivalent volume change in both the collection and landfill lines of business

<table>
<thead>
<tr>
<th>% of Collection &amp; Landfill Revenue</th>
<th>Business Line Incremental Margin</th>
<th>% Incremental Margin on Volume</th>
</tr>
</thead>
<tbody>
<tr>
<td>Landfill - Third party</td>
<td>16%</td>
<td>50%</td>
</tr>
<tr>
<td>Collection - Including LF margin</td>
<td>84%</td>
<td>30%</td>
</tr>
<tr>
<td>% of Total Collection &amp; Landfill</td>
<td>100%</td>
<td>33%</td>
</tr>
</tbody>
</table>

Note: The incremental margin for the landfill ranges from 45% to 50% and for the collection operations ranges from 25% to 35%. The margins shown in the table are chosen from these ranges to illustrate the calculations.

* This GAAP measure may also be referred to as EBIT margin
### New Project Return Criteria

**Minimum Internal Rate of Return by Business Type**

<table>
<thead>
<tr>
<th>Business Type</th>

</tr>
</thead>
<tbody>
<tr>
<td>Collection and Landfill</td>
<td>12%</td>
</tr>
<tr>
<td>Recycling</td>
<td>15%</td>
</tr>
<tr>
<td>Waste-to-Energy</td>
<td>11%</td>
</tr>
<tr>
<td>Organic Growth</td>
<td>17%</td>
</tr>
</tbody>
</table>

*Note: Return requirements are adjusted based on the risk profile of the investment*
2010 Investments and Acquisitions

• Purchased in April 2010 a waste-to-energy plant in Virginia from the Southeastern Public Service Authority for $150 million

• Purchased in March 2010 a 40% interest in Shanghai Environment Group, a company dedicated to developing waste-to-energy facilities in China for $142 million

• We expect to spend $250 million to $350 million for other acquisitions, primarily in solid waste. During the first half of 2010, we closed on approximately $120 million of acquisitions
2010 Use of Cash from Operations and Proceeds from Divestitures of Businesses*

* The reconciliation illustrates a projection. The amounts used in the reconciliation are subject to many variables, some of which are not in our control and therefore are not necessarily indicative of actual results.
** Expected annual payment of $1.26 per share in cash dividends over the course of the year. Each dividend must be separately declared by the Board of Directors.
*** Common share repurchases may be up to $685 million dollars.

<td><strong>-</strong></td>
</tr>
</tbody>
</table>
Cash Dividends Paid Per Share Annually

Yield of 3.7% at a $34 share price

* The Board of Directors approved an 8.6% increase in the quarterly dividend rate to $0.315 on December 17, 2009. The Company paid a quarterly cash dividend of $0.315 per share on March 19, 2010 and June 18, 2010 and declared a dividend of $0.315 per share to be paid September 24, 2010. The Board reserves the right to declare and pay future cash dividends.
5 Year Growth Targets

• We assume that over the next 5 years the economy will steadily but slowly improve.

• Compounded annual revenue growth rate of between 3% and 5% driven by price and volume. Additional revenue growth from acquisitions, spending on average between $200 million and $300 million each year.

• Compounded annual earnings per diluted share growth rate of between 8% and 12%, with the earlier years at the lower end of the range.

• Capital expenditures between 9% and 11% of revenue.

• Free cash flow growth in line with operating earnings growth.

• ROIC improving 50 to 100 basis points per year.
