Grease Trap Disposal

FOG 2 Fuel℠

Grease Trap Food Waste Processing

WM uses a simple approach to separate water and residuals from Fat, Oil and Grease (FOG).

Through the treatment process FOG is converted into a primary feedstock for renewable fuel production.

- **Beneficial Reuse**
  Converting grease trap waste into a primary feedstock for bio-diesel and sustainable aviation fuel production
- **Efficient operations**
  Ability to easily offload two vacuum trucks at the same time
- **Convenient location**
  Centrally located in tri-state region, greater NYC Metro Area

WM NJ CORe® Facility
847 Flora Street
Elizabeth, NJ 07201
