Re: Environmental Compliance Approval (ECA) Application – Overall Revision of ECA A371203
Waste Management of Canada Corporation (WM) – Richmond Landfill Site

To whom it may concern:

In January 2020, WM submitted an ECA application to the Ministry of the Environment, Conservation and Parks (MECP), seeking an amendment to several conditions of ECA No. A371203 issued for the Richmond Landfill.

As part of this application, WM is requesting the removal of all Conditions pertaining to the Public Liaison Committee (PLC). Over the last year, no individuals have contacted WM regarding any site events or activities. The PLC continues to receive copies of all submissions to the MECP regarding the Richmond Landfill, including ECA applications and relevant monitoring reports, and neither WM, nor the consultants who prepared the reports, have been contacted by any member of the public regarding content in recent years. WM has communicated with the MECP – Kingston District Office to identify individuals who are interested in maintaining the PLC, and to date no persons have been identified.

In discussions with the MECP regarding the dissolution of the PLC, WM has committed to providing monthly updates regarding site operations on the Richmond Landfill website should the Conditions regarding the PLC be removed from the ECA. This is the same website where information regarding past notices to interested parties are provided, along with relevant monitoring data, and semi-annual and annual reports.
