East Oak Landfill Spring 2026

MANAGER'S REPORT

Pete Schultze
Sr. District Manager

There's been a lot happening lately, both on site and in the community, and we're excited to share the latest updates from East Oak Landfill.

Spring is in full swing, and as tradition holds, the garden is once again being prepared for planting. This annual effort is spearheaded by Shawn Cockrell and Rick Padgett, whose dedication helps keep East Oak Landfill looking its best year after year.

Construction is also underway on a new landfill cell, marking an important milestone for the site. This nine-acre cell is the first to be built within the expansion area approved five years ago. Once complete, it will provide a larger working area for customers, helping improve efficiency and overall site operations.

Over the winter months, we completed upgrades at the RNG plant, increasing processing capacity. These improvements enhance operational efficiency and support our commitment to sustainable operations.

launched WMoklahomaStorm.com—a quick and reliable resource for severe weather updates. Visitors can select their county to view real-time alerts related to landfill operations and waste collection services impacted by storms.

COMMUNITY IMPACT

Community involvement continues to be a top priority at East Oak Landfill. Jarvis Davis, Environmental Protection Manager, and Pete Schultze, Sr. District Manager, recently attended the Keep Oklahoma Beautiful Student Environmental

Champions Award Ceremony on April 8 at the Oklahoma Aquarium, Tulsa. WM proudly sponsored this event as a the Changemaker, providing a college scholarship to a high school or college student. The event

welcomed approximately 150 students and guests from across the state and showcased inspiring environmental projects. A highlight of the ceremony was the 4th grade cap art program, where students creatively repurposed plastic bottle caps into artwork. The program raised awareness among hundreds of students about the importance of recycling and creative reuse, showing how small actions can make a meaningful impact.

On April 24, we will partner with Keep Oklahoma Beautiful (KOB) to help clean up portions of Lake Arcadia.

WM will again sponsor the Bixby BBQ event, scheduled for May 14–16, marking 25 years of partnership. Support will be provided through an in-kind sponsorship that includes four roll-off containers and event boxes.

Thank you for your continued support—we look forward to another busy and rewarding spring.
