

East Oak Landfill Summer 2025

Manager's Report

PETE SCHULTZE
*Sr. District
Manager*

Hello neighbors! Shawn Cockrell, East Oak's Operations Manager, has been busy in the garden this quarter, and we're excited to report it's starting to come in! As always, we're looking forward to enjoying the fruits (and vegetables) of his hard work. The vegetables grown at East Oak's community garden are donated to landfill staff and a local food pantry. This annual tradition helps feed many each year.

The gas plant has been fully operational. When the natural gas plant is running at full capacity, you won't see a flare, but rest assured, that means everything is running smoothly!

Looking ahead, our team will be focused on addressing erosion control and mowing across the site. With more than 30 inches of rain recorded recently, there's plenty of cleanup and regrowth to manage, especially with how fast the grass is growing.

In exciting regional news, the Oklahoma City Thunder won the NBA World Championship! WM played a key role in supporting the city's celebration efforts, including cleanup and logistics during the victory parade on June 24. Special thanks to our team and the hauling company for their help in making it a success.

Thank you to everyone for your continued hard work and support as we maintain and improve the site throughout a very wet summer.

East Oak Landfill's annual vegetable garden. The excess vegetables grown in this garden, will be donated to a local food pantry.

The Oklahoma City Thunder celebrate their first NBA Finals title win with a champions parade throughout downtown Oklahoma City on Tuesday, June 24, 2025.
