Notice

March 20, 2012

On March 14, 2012 our office received from Chemical Waste Management, Inc. – Kettleman Hills Facility (KHF), 35251 Old Skyline Rd., Kettleman City, CA, an application to amend their existing Report of Facility Information (a Joint Technical Document, shared with the Regional Water Quality Control Board) for MSW landfill B-17 (SWIS #16-AA-0027).

The application requested an amendment to the JTD to update the document verbiage from future tense to present tense and to make minor changes to the text to reflect current operations and conditions. Estimates for future closure costs were also updated.

On March 20, 2012 our office found that the application and supporting documents met the requirements of 27CCR 21665(c), and approved the amendment.

California Public Resources Code section 44307 provides the mechanism for appealing this LEA approval.

Additional information regarding this application is available from the following:
