Skyline Landfill Spring 2026

MANAGER'S REPORT

Ross Boring
Sr. District Manager

Spring has arrived at Skyline Landfill, bringing blooming bluebonnets and continued progress across the site. The year started strong, and we're pleased to share a few updates on operations, communication improvements, and community programs. A landfill gas project is planned for Q2 of 2026. This project will add new landfill gas collection wells and integrate them into the existing system, supporting efficient operations and ongoing environmental protection.

STAYING CONNECTED

WM is excited to offer new ways to stay informed about Skyline Landfill.

Visit [Skyline Landfill | WM](#) for quarterly newsletters, site updates, and landfill information.

With spring comes storm season. To help residents stay prepared, WM has launched [WMTexasStorm.com](#), a quick and reliable resource for severe weather updates.

At [WMTexasStorm.com](#), you can select your county (Ellis or Dallas County) to view real time alerts on landfill operations and waste collection services affected by storms. Bookmark the site or scan the QR code to stay informed during severe weather.

When Severe Weather Strikes

- 1 VISIT [WMTexasStorm.com](#)
- 2 FIND Your County
- 3 READ Service Alert Info

SCHOLARSHIP OPPORTUNITIES

Big dreams start here: scholarships are available for students advancing their education.

Eligibility highlights:

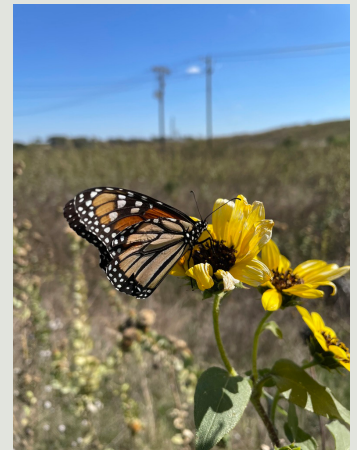

- High school seniors or enrolled college students
- Minimum 2.5 GPA
- Ferris, TX resident (proof required)

We're proud to support education and invest in our local community. To request an application please contact Misty Adams.

WILDLIFE HABITAT CERTIFICATION

Skyline Landfill continues to demonstrate that landfill operations and wildlife conservation can coexist. Certified by the Wildlife Habitat Council (WHC) since 2009, the site was successfully re-certified in January 2026. WHC—now known as Tandem Global—supports businesses nationwide in integrating biodiversity with environmental and community initiatives.

In summer 2025, 10 acres of certified habitat were reseeded, and we're now documenting plant and animal species as the habitat continues to thrive. This area benefits local wildlife and provides educational opportunities for the community.
