

OPEN HOUSE

at High Acres

The High Acres Open House is always a hit! Each summer, we invite the community to learn how High Acres operates – from construction and design to renewable energy production. Our team enjoys uniting with local partners to make this event a community-wide success.

This year, our open house is a Zero Waste event! Compostable utensils and food waste will head straight to our composting facility and water refill stations replace plastic bottles.

**Always Working
For A Sustainable
Tomorrow®**
