

SB 1383 Procurement

As of January 1, 2022, cities and counties in California are required to procure recovered organic waste products to meet an annual target based on its population. WM is equipped to provide SB 1383 compliant compost and mulch products, and a record keeping process validated by CalRecycle.

With our statewide network of processing facilities, we provide quick and reliable service to meet every jurisdiction's needs.

Products and Services

Our team of experts will help you meet SB 1383 procurement requirements. We offer:

- Premium compost and mulch products to meet procurement requirements
- CalRecycle approved record keeping
- Plug and play DSP process and accounting
- Compost classes and giveaway events for your residents

Usage and Benefits

Our high-quality compost and mulch products can be applied in city parks, along roadways, on center divides, and in community and school gardens. Together, we can increase sustainability, improve soil and air quality, conserve water, help with erosion control all while benefiting local communities and spaces.
