

THANK YOU FOR BEING A WASTE MANAGEMENT CUSTOMER!

You've recently received a red tag on your recycling, indicating there was garbage mixed in with your recyclables. As you know, when it comes to recycling, getting the right things in the cart makes all the difference. So keeping those non-acceptable items out – which includes wet, dirty items, and household materials like hoses and bowling balls - helps to ensure the recyclables go on to their next best life.

We are here to help you get back to recycling right and avoid service interruptions or penalties.

So the next time you put something in your recycling, remember the three simple recycling rules below:

Recycle clean bottles, cans,
paper, and cardboard.

Keep food and liquid
out of your recycling.

No loose plastic bags
and no bagged recyclables.
