

Community Pride Means Recycling Right!

Did you know that recycling is not only great for the planet, but good for your apartment complex too? Studies have shown that residents who recycle are more likely to take ownership of community spaces, plus recycling can boost the aesthetics of your building, especially improving the conditions of the waste collection area.

The fact is that some recycling actions make a bigger impact than others. So please remember these three basic rules the next time you recycle:

**Recycle all empty bottles,
cans, paper and cardboard.**

**Keep food and liquids
out of the recycling.**

**Empty recyclables
directly into your cart
- NO bagged recyclables.**

You would be amazed by how big of an impact you can make just by following these simple rules!
