Summer 2024 Newsletter

## SUMMER SAFETY TIPS

Hot coals, batteries and small propane tanks can cause dangerous fires if not disposed of properly. Please follow these basic rules to protect our neighborhoods and equipment and to keep our employees safe.

### HOT COALS

Make sure hot coals are fully extinguished before placing in the trash. Place in a metal container and drench in water and/or wait several days before placing in the trash.

### BATTERIES

Use our BatteryTracker® service to recycle your Household (C, D, AA, AAA, etc.) or lithium-ion batteries. Visit [wmlamptracker.com](http://wmlamptracker.com) to order online and recycle at your mailbox.

### PROPANE TANKS

Propane tanks can wreck havoc at landfills or in the hopper of trucks. These materials must be disposed of at a household hazardous waste facility. Never in your carts.

### FIREWORKS

Celebrating with fireworks is an exciting tradition, but fireworks can also be dangerous. Use a bucket of water to dispose of fireworks. Leave fireworks soaking overnight before disposing in the trash.

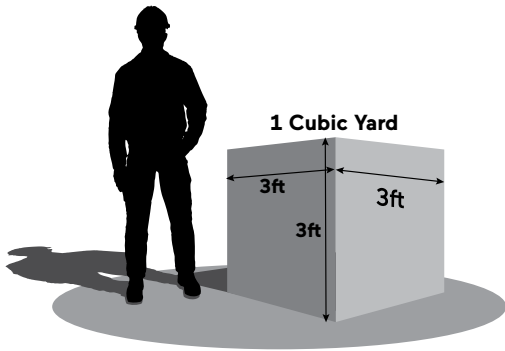

## Summer Cleanup: Extra Waste Alternative

Take advantage of a free extra waste disposal alternative this summer. If you are planning a big cleanup to get rid of unwanted or unused items, WM and Storey County provide dump vouchers to dispose of up to four cubic yards of waste in a single load. Residents can request vouchers in person at Storey County Administrative Offices, 26 S. B Street, Virginia City, NV 89400.

### YARDAGE CALCULATION

$$L \times H \times W / 27 = \text{Cubic Yards}$$

**1 cubic yard is approximately the size of a washing machine.**

## DROP OFF LOCATIONS

### Virginia City Transfer Station

150 R Street (Washington Intersection)  
Virginia City, NV 89440

**Winter Schedule: October 1 – April 30**

Thursday - Saturday
