

Our online Diversion and Recycling Tracking (DART®) tool puts your environmental data at your fingertips.

As the environmental demands on your projects grow, so does the need for you to be able to chart, track and document your progress. Waste Management helps you do this easily with our exclusive, online Diversion and Recycling Tracking tool, also known as DART.

Sign up today and you'll soon be able to track diversion rates across every project and job site. With our one-of-a-kind, Internet-based portal, you'll be able to benchmark your progress and create customizable reports with just a few clicks.

Benefits of Waste Management's DART include:

- A global view of the material diversion from your projects, showing trends over time
- The ability to track diversion rates and volumes from the global level to MSA (Metropolitan Statistical Area) to specific project
- 24-hour access to your data
- Easy, self-service usability via secured, password-protected accounts
- View reports according to a variety of criteria
- Consistent, reliable reports formatted to align with the structure of your business
- Simplified tracking and reporting for LEED® certification submissions with reports that are easily uploaded to the Green Building Certification Institute's LEED Online system
- Automatic calculators for creating your own environmental impact "green facts" for your marketing purposes
- Exportable, downloadable graphs and charts

Sign up online today at wm.com/DART.

MONITOR DIVERSION PROGRESS AT ALL OF YOUR JOB SITES AND CREATE REPORTS THAT WORK FOR YOUR BUSINESS.
