When you’re renovating the world's fifth-busiest airport, staying on time is more than a priority. It’s a mandatory. Of course you have to factor in the elevated security concerns associated with the job. There’s also the need to help the facility meet LEED® requirements to achieve necessary points for environmental certification.

So when the Tom Bradley Terminal at Los Angeles International Airport was being brought into the 21st Century, the demolition team worked in close partnership with the Waste Management sales force to get the job done with each of these important factors in mind. In addition, we were able to provide the airport with a single point of contact to pilot our entire team.

Helping LAX renovations arrive on time.
