

HEALTHCARE SOLUTIONS

As North America’s leading environmental solutions company, Waste Management stands ready to help improve the health of your entire organization. Across the country, we employ a variety of treatment technologies, including autoclave and incineration. All our facilities and transfer stations for medical waste are designed to optimize safety and savings.

In addition, in response to the complexities of the healthcare industry, our Healthcare Solutions experts can work with you to implement a host of other healthcare-specific services that minimize waste, protect your patients, staff and the environment, and maximize your business performance. How can we help you?

Give us a call today and let’s start the conversation.

THINK GREEN.®

THINK GREEN.®

Three levels of safety training and OSHA compliance.

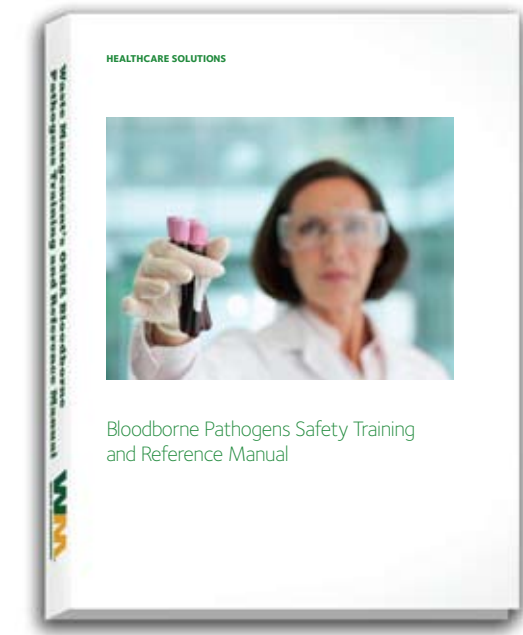

OSHA’S Bloodborne Pathogens Standard protects employees who work in occupations where they are at risk of exposure to blood or other potentially infectious materials. Waste Management Healthcare Solutions has developed three plans – Basic, Plus, and Premium – to provide the training necessary to protect the health and safety of your healthcare workers in compliance with relevant OSHA regulations.

The Manual

Waste Management’s Bloodborne Pathogens Safety Training and Reference Manual is an indispensable aid as you train your healthcare workers to comply with OSHA regulations and reduce workplace injuries. This more than 300–page manual addresses the major safety concerns of healthcare organizations, with extensive coverage of the following:

- Contact information for state regulators
- Bloodborne pathogens standards
- Hazard communication
- Personal protective equipment
- Electrical safety
- Standards for means of egress
- Emergency preparations
- Recording and reporting, including form standards
- Commonly used forms

The Webinars

Each month, subscribers to the Plus and Premium plans also receive access to our Healthcare Solutions webinars. Moderated by our Healthcare Solutions professionals, these online sessions:

- Supplement the information provided in the BBP Manual
- Satisfy Standard 29 CFR 1090.1030 initial and annual training requirements
- Present relevant workplace regulations in an easy-to-follow format
- Provide practical tips and safeguards to make compliance simpler
- Address associated OSHA standards applicable to the healthcare services industry

In addition, each participant is given access to other training materials, including a specially designed test to support the instruction. Each will also receive a certificate of participation.

The Compliance Audit and Safety Inspection

OSHA requires applicable businesses to conduct employee training and update compliance programs every year. As a subscriber to the Premium plan, you will receive an annual on-site consultation with a Healthcare Solutions professional, who will survey your OSHA compliance and workplace health and safety practices.

Premium program participants receive:

- An audit of the following written compliance programs:
 - Bloodborne Pathogens Exposure Control Program
 - Hazard Communication Program
 - Emergency Action Plan
 - Fire Prevention Plan
- A walk-through safety inspection to support the program audit and help formulate audit recommendations
- A follow-up written report that includes:
 - OSHA Compliance Program Executive Summary
 - Identification of potential OSHA violations
 - Recommendations to improve OSHA compliance with applicable standards
- On-site, instructor-led presentation of Bloodborne Pathogens Safety Training, including a test and training certificates.
