

Containers for Industrial & Special Waste Generators

Waste Management offers permanent roll-off services that set the industry standard for service excellence. In most areas containers are available in sizes ranging from 10 to 40 cubic yards. All are made from sturdy, high-strength steel and are maintained to ensure safety and environmental compliance.

Roll-off services are perfect for such generators as:

- Asbestos collection facilities
- Construction & demolition (C&D) sites
- Drum collection facilities
- Household hazardous waste facilities
- Manufacturing plants
- Refineries
- Remedial sites
- Warehouses
- Wastewater treatment plants

SUPERIOR SERVICE AND VALUE

Waste Management strives to see that its industrial roll-off containers are delivered as promised, placed in the most convenient and accessible locations available and serviced in accordance with the highest professional standards.

In most locations Waste Management remains on call to make emergency pick-ups when waste generation is higher than anticipated. In most areas same-day service is also available.

Other benefits of Waste Management's industrial roll-off service include:

- Manifest review and preparation
- Compliance with DOT and local hauling regulations to ensure that boxes are pulled safely and within legal weight limits
- Assisting with profiling to ensure prompt service
- Drivers hauling industrial waste have either extensive training and/or hazardous material certifications
- Drivers are drilled in emergency response preparedness

All of Waste Management's roll-off containers are designed and maintained to ensure safety and environmental compliance.

Trained drivers and state-of-the-art equipment ensure that your roll-off containers will be delivered where you need them, when you need them.
