

Drive sustainability with insight and control

ENSPIRE® helps you improve operational efficiencies, align sustainability with business objectives, and show stakeholders your results.

ENSPIRE® is an enterprise-class business intelligence platform designed specifically for Waste Management customers. It centralizes and streamlines disparate data on a single screen, allowing you to track projects against goals with KPIs and custom nomenclature.

Get the big picture and control the details

See things clearly and make more intelligent decisions to support your sustainability strategy.

Actionable insights lead to improved outcomes.

ENSPIRE® delivers dashboards, scorecards, executive summaries and customized reporting to fit your specific needs. It's your data and your success story to share with stakeholders.

Features	Benefits
Customizable visualizations, from high level to granular	Increase efficiency of strategic planning
Analytics across multiple data sets	Uncover trends and avoid blind spots
Intuitive user experience	Simplified adoption and use
Bookmarking and exporting of data	Empower your people with information and enable collaboration
Chargeback and showback reports	Increase internal accountability
Cloud-based platform	Scalable, flexible and accessible from any device
Regulation mapping	Compliance, risk mitigation and peace of mind

THINK GREEN.®
