

## Green Globes

As the exclusive administrator of the Green Globes rating system in the United States, the Green Building Institute is the first green building organization accredited as a standards developer by the American National Standards Institute (ANSI). Buildings certified under the official Green Globes ANSI standard can produce benefits including lower energy costs and increased property values, with lower costs to the developer than other green building rating systems.

However, without an integrated design process where architects, contractors and sustainability considerations are aligned from the start, it's easy to see how cost overruns, project delays and missed opportunities can be the result. Our consulting team is staffed with architects and other experienced green building professionals to help facilitate an interdisciplinary design process. Engaging Waste Management consultants can help streamline the process and eliminate uncertainties, to help your project earn the highest certification rating possible.

From program implementation to comprehensive certification management, our solutions can help your organization reach its Green Globes certification goals, from single-building projects to multi-building portfolios. Our seasoned professionals will provide the practical experience you need to navigate the certification process, saving you time and money. We can evaluate your organization's project to determine its potential certification level and provide you with value-driven recommendations move toward certification success. Our consultants can help your project team develop the needed internal programs, processes and policies required to achieve the highest possible certification ratings and resource efficiencies.

## About Sustainability Services

Waste Management Sustainability Services is a nationwide network of environmental professionals offering sustainability advisory services, environmental and project management experience to help companies advance along the path toward sustainability. By leveraging the network of assets and expertise of Waste Management, the leading provider of comprehensive waste and environmental services in North America, our team can design and implement value-driven solutions unrivaled in the industry.
